## Disclosures

On September 24, 2020 CLS Investments, LLC (CLS) (and its OAS affiliates) and Brinker Capital, Inc. (BCI) were acquired by Orion Advisor Solutions, Inc. ("Orion"), a newly formed company controlled by funds affiliated with Genstar Capital Partners LLC and TA Associates (the "Change of Control Transaction"). Immediately following the Change of Control, BCI merged into CLS and the combined entity was known as Brinker Capital Investments, LLC. Effective December 31, 2022, Orion Portfolio Solutions, LLC, an affiliated adviser, was merged with Brinker Capital Investments, LLC (Brinker) with Brinker surviving the merger and changing its name to Orion Portfolio Solutions, LLC. Orion Portfolio Solutions, LLC d/b/a Brinker Capital Investments a registered investment advisor. BCI legacy business and CLS legacy business operate independently as separate divisions (respectively, the "Brinker Division" and the "CLS Division"). The CLS Division claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. CLS has been independently verified for the periods 01/01/2003 – 12/31/2022. The verification reports are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. This report includes information regarding the investment programs offered and operated by the CLS Division. Brinker Capital Investments relies on the performance data of its GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Accounts are assigned to a composite based on the Brinker investment strategy and the client's risk tolerance. Brinker classifies our investment strategies into the following groups, Risk Budgeted, Protection, Focused Strategies, High Quality Strategic, Endowment, and Income. Accounts assigned to the Risk Budget composites utilize an active asset allocation strategy to build a balance diversified portfolio that is representative of the client's tolerance for risk. Protection composites are also Risk Budgeted, but contain accounts that utilize a strategy that is tactical in nature and designed to protect against large market declines. Non-Risk Budgeted composites, including Focused Strategies, High Quality Strategic, and Income, include accounts that have a similar investment objective, as further described in the composite descriptions. The firm's list of composite descriptions is available upon request and included herein.

The "30 to 39" and "Protection 30 to 39" composites were redefined as of January 1, 2014 to "20 to 39" and "Protection 20 to 39." The composite chart discloses the redefined composite description and benchmark. The composite was redefined because there are more offerings now available and utilized at the lower risk budget score, making it feasible to effectively manage clients at the lower range. Due to this change, the benchmark was also redefined from 35% EBP/ 65% cash equivalent to 30% EBP/ 70% cash equivalent effective as of January 1, 2014. The benchmark was refined because 30 is the midpoint between 20 to 39 for both "30 to 39" and "Protection 30 to 39" composites.

The Equity Baseline ("EBP") is a blended index comprised of 60% domestic equity and 40% international equity, rebalanced daily. The EBP is combined with a cash equivalent index to create a combined blended index appropriate for various composites. Prior to January 1, 2020, these indexes were represented by the Russell 3000 Index (domestic equity), MSCI ACWI ex U.S. Index (international equity), and Bloomberg Barclays 1-3 Month U.S. TBill Index (cash equivalent). Beginning January 1, 2020, these indexes were replaced with the Morningstar U.S. Market Index (domestic equity), Morningstar Global ex U.S. Large-Mid Index (international equity), and Morningstar Cash Index (cash equivalent). The new indexes were chosen to bring the various components of the blended index within a single index provider. The new indexes are displayed for all time periods.

Prior to December 13, 2014, the equity portion for High Quality-Moderately Aggressive, High Quality-Moderate, and High Quality-Moderately Conservative was a blended index comprised of 80% domestic equity and 20% international equity, rebalanced daily. Beginning on December 13, 2014, the equity portion became 60% domestic equity and 40% international equity, rebalanced daily.

On January 1, 2020, the benchmark for the Focused Strategies - Domestic Equities Composite was changed to the Morningstar U.S. Market Index. Likewise, the benchmark for the Focused Strategies - International Rotation Composite was changed to the Morningstar Global ex U.S. Large-Mid Index. These changes were made to coincide with the changes in the components of the EBP (see above). The domestic equity components for the Focused Strategies - Active Growth and Focused Strategies - Active Value Composites were updated to the Morningstar U.S. Growth and Morningstar U.S. Value Indexes respectively. All new index assignments are displayed for all time periods.

Returns are presented net of management fees and trading expenses, and reflect the reinvestment of all income. Net of fees performance is created by computing, on a monthly basis, gross fee returns and reducing the return for each account by 1/12th of the actual applicable annual management fee rate. Management fees incurred will vary and range from 0% up to 2.65%. See Brinker's Form ADV, available at [www.orion.com](http://www.orion.com), for information regarding Brinker's standard fee schedules.

Performance results may or may not depict the actual investment experience of any single client due to the timing of investment contributions, withdrawals, trade implementations and client or adviser directed investments. Composite performance results exclude (i) accounts under Brinker management which do not maintain a balance during the entire composite period, and (ii) certain accounts under Brinker management that have temporarily been removed from Brinker discretion through client initiated actions. Accounts with a significant cash flow will be excluded from composites for the month when the cash flow occurs. Significant is defined as (i) the cash flow exceeds 10% of the account's beginning value for the month and (ii) the cash flow is not allocated on the date of receipt. Brinker management fees are considered a cash flow for the purposes of calculating the 10% figure. Past performance is not indicative of future results.

The annual composite dispersion is an equal-weighted standard deviation calculated using accounts net of fee return for the accounts in the composite over the entire year. Dispersion is "na" for partial year periods. The three year Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio, usually computed using 36 net monthly returns. The three year standard deviation is "na\*" due to the lack of 36 months of consistent performance for the composite.

The U.S. Dollar is the currency used to express performance in the composite tables. \$1.00 is the minimum asset level for a portfolio to be included in composite calculation.

Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. Beginning in March 2004 and continuing through the present time, Brinker has utilized the assistance of a sub-adviser or investment research provider for certain client accounts as described in Brinker's ADV.

Brinker participates in a wrap fee program. For wrap fee accounts, the following fees are included in the wrap fee: trading and transaction costs, investment management, and portfolio monitoring. Please refer to our Wrap Fee Program Brochure for additional details regarding these strategies. \*Wrapped fee accounts make up between 0% and 3% of the designated composites for each year represented by (\*) in the table below. The percentage of wrapped fee accounts per composite for 2015 and 2016 have been corrected.

Percentage of wrapped fee accounts per composite (\* indicates less than 2%)

High Quality Strategic - Conservative	The High Quality Strategic Conservative Composite contains all discretionary accounts which are strategic in nature, and desire target equity exposure of between 19 and 29%.	20% EBP/ 80% Barclays Capital U.S. Aggregate Bond Index, rebalanced annually	3/1/2014	7/31/2016

<sup>†</sup>Effective January 1, 2018, the benchmark for the Focused Strategy – Alternatives composite was changed from a blended index consisting of 50% Russell 3000 / 50% Bloomberg Barclays U.S. Aggregate Bond Index to the Morningstar Diversified Alternatives Index to better reflect the holdings within the portfolio. The Morningstar Diversified Alternatives index is shown for all timeframes.

The Morningstar US Market Index is an index that measures the performance of U.S. securities and targets 97% market capitalization coverage of the investable universe. It is a diversified broad market index. Morningstar Global ex U.S. Large-Mid Index is an index that measures the performance of Global Markets (ex-U.S.) equity markets targeting the top 90% of stocks by market capitalization. The Morningstar Cash Index is an index that measures the performance of a Treasury Bill with six to eight weeks until maturity in the U.S. market. The Nasdaq Multi-Asset Diversified Income Index is an index encompassing U.S. Equities, U.S. REITs, Master Limited Partnerships, Preferred Stocks, and High Yield Corporate Bonds. The Morningstar Diversified Alternatives Index allocates among a comprehensive set of alternative underlying ETFs that employ alternative and non-traditional strategies such as long/short, market neutral, managed futures, hedge fund replication, private equity, infrastructure or inflation-related investments. The Bloomberg Barclays U.S. Aggregate Bond® Index measures the performance of the total United States investment-grade bond market.

The Dow Jones Global Select Real Estate Securities Index is composed of equity real estate investment trusts and real estate operating companies traded globally. The Bloomberg Commodity Index is composed of futures contracts on physical commodities. Unlike equities, which typically entitle the holder to a continuing stake in a corporation, commodity futures contracts normally specify a certain date for the delivery of the underlying physical commodity. The S&P Global Natural Resources Index is composed of 90 of the largest publicly-traded companies in natural resources and commodities businesses. The Bloomberg Barclays Municipal Bond Index is a market value weighted index of investment grade municipal bonds with maturities of one year or more. The Morningstar U.S. Real Asset Index is a diversified portfolio of four different asset classes that have historically displayed high sensitivity to inflation. Asset classes include a 40% allocation to Treasury Inflation Protected Securities, a 30% allocation to Commodities, a 15% allocation to Real Estate Investment Trusts, and a 15% allocation to Commodity Stocks. The Morningstar U.S. Growth Index and the Morningstar U.S. Value Index are indices based on the Morningstar U.S. Markets Index which gauge performance of stocks considered growth or value, respectively. The Bloomberg Barclays U.S. 7-10 Year Treasury Index includes treasury bonds issued by the USA with a time to maturity of at least 7 years but no more than 10 years. The returns for the indexes are total returns, which include reinvestment of dividends. The volatility of the indexes may be materially different from the individual performance attained by a specific investor. In addition, portfolio holdings of investors may differ significantly from the securities that comprise the indexes. You cannot invest directly in an index.

The performance of non-fee-paying accounts were reduced by a model fee of 3%, accrued monthly. This fee represents the maximum allowable investment management fee for all composites. This practice of accruing a fee for non-fee-paying accounts began with the 2022 Firmwide Composite report, and performance for all timeframes may have changed from previously published reports
